

# INTRODUCING **Stack** by amcase

www.amcase.com

amcase has become well known among electronic retailers and RTO establishments for being the forerunner in electronic and appliance display fixtures.

amcase is introducing the second biggest breakthrough in electronic display fixtures. The **Stack** system offers a wide range of finish options, merchandising elements and architectural enhancements in a modular system with a definite high style edge.

"Color and style-themed areas, cross merchandised departments, unique vignettes, powered walls, floor fixtures, signage and accent panels are just a few of the exciting possibilities that can be achieved with the **Stack** display system," said project manager, Marsha Davis.
