

Care & Maintenance

Cleaning

- Almost any cleaning agent may be used to clean AMCASE® products. Examples are window cleaners, detergents and foaming cleansers.
- Permanent ink marks may be removed with solvent based products like Mineral spirits, M.E.K. & lacquer thinner.
- Abrasive products or scouring pads, steel wool or sand paper are not recommended.
- It is always advisable to test a small inconspicuous area to make sure that the cleaning agent does not adversely affect or damage the surface being cleaned.
