## PROJECT INFO:

**Client:** Diverse Range of Customers

**Location:** Throughout the U.S.A.

## Rolling with AMCASE®

There always seems to be a great need for mobile cabinets. Although many of them find their way into the medical environment such as hospitals, clinics, and dental offices, many of our clients are lab industries or retail stores needing mobile casework solutions. Our mobile casework offering may just be what you are looking for.

Every solution is different; that's why there's AMCASE®.

# Poetry in Motion

Drawers, doors, shelves and locks, gaze upon our mobile box  
 Pass through shelves, sliding doors, come and see there's so much more  
 Cable wire management, look and see you'll be content  
 Grommet holes, pull-out bins, customers are pleased again  
 Locked doors, waste-bin storage, competition can't ignore us  
 Keyed locks, or remotes, this is something you should note  
 With a hasp, or a key, you'll promote security  
 Folding tops and bedside tables, it's our base that keeps them stable.

Slatwall panels, people look, now I think we have you hooked  
 HPL, TFM, solid surfaces and then  
 Biocidal surfaces, helpful science says it is  
 Single locking, central locking, caster locks – keep from rocking  
 Large or small – caster wheels, make a choice it's what appeals  
 Finally, hope you see, just how much variety  
 Can be found, in our line, hope you use us all the time  
 Use our quote, be so kind and sign on the dotted line.
