

AMCASE® OVERLAYS PANEL SYSTEM

PROJECT INFO:

Client: Medical Facility

Location: North Carolina

It's rare to find one company that can provide everything you need for a project; perhaps impossible. AMCASE® realizes that sometimes product integration is the solution to a customer's situation. This was the case at a North Carolina medical facility. AMCASE® enclosed a steel panel system with laminate panels and solid surface worktops. The end result was a highly functional workspace through our integration of two furniture systems.

The AMCASE® Solution

Our client liked the capability of AMCASE® to integrate with other major furniture systems. Our on-site manufacturing facility gives us the distinct ability to oversee the integration first-hand. This eliminates the coordination of multiple manufacturers, simplifies communication, and increases project efficiency. Every solution is different; that's why there's AMCASE®.
