

# MAKORE™ NOW AT VIRGINIA TECH

**PROJECT INFO:**

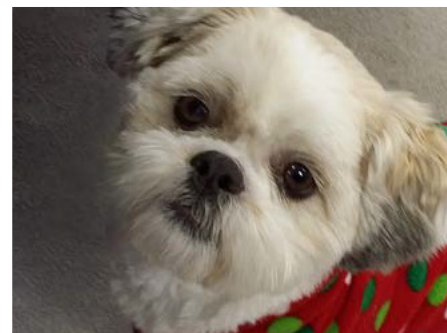

**Client:** Virginia–Maryland  
Regional College of Veterinary  
Medicine

**Location:** Blacksburg, VA

When Virginia Tech’s Special Projects Coordinator was given the green light to update their existing casework in the Veterinary Teaching Hospital, they turned to AMCASE® to bring both beautiful aesthetics and innovative design to better equip the hospital staff for small animal care and examinations.

The transformation was quite impressive and the results are paving the way to a better experience for everyone involved.

**The AMCASE® Solution**

Each exam room was outfitted with the Makore™ product line by AMCASE®, a wall suspended casework system that has integrated sinks, drawers, overhead storage, and a modular accessory bar for dispensers, sharp kits, and other medical accessories.
