

# SEE THE PROOF

## PROJECT INFO:

**Client:** Industry Laboratory

**Location:** Kentucky

Chances are this client's handy work has indulged your taste buds a time or two with your favorite drink. And like this lab's mission to bring unsurpassed flavoring to your preferred beverages, AMCASE® and its sales team have proven to bring unmatched modular casework and customer care to its clients. This lab required a variety of design elements as diverse as their flavoring formulas. Working together, we designed something that delighted all of their faculties, not just their sense of taste.

## The AMCASE® Solution

After their initial installation which utilized half-height pharmacy drawer fronts in order to easily view stored products, their needs changed requiring some reconfigurations. In addition to furnishing a new area, they wanted to replace the half-height pharmacy drawer fronts with full fronts to conceal the drawers' contents and streamline the look of their lab. Both the addition and the drawer front replacements were carried out seamlessly. The client was extremely satisfied about their new look and the beautiful transformation to their lab.
