

# SWEET LAB

## PROJECT INFO:

**Client:** Laboratory

**Location:** New Jersey

It turns out what we grew up learning about our sense of taste is not entirely true. There are now five, not four, distinct tastes and possibly more to come. This unique lab AMCASE® had the privilege to furnish develops flavors and scents for foods. Our casework provided organization and the functional space they needed to transform this 1200 sq. ft. room into an R&D lab for it's lead formulators and scientists.
