

CENTER STAGE NURSE STATION

PROJECT INFO:

Client: Hospital

Location: New Jersey

At AMCASE®, we enjoy working on nurse station projects because of the diversity often found in these spaces. We outfitted this hospital with a curved nurse station utilizing both HPL work surfaces and solid surface transaction tops. Storage cabinets, work stations, and wall cabinets rounded out this installation to address the multifaceted needs of this communication hub. Yet, another satisfied customer is what we enjoy most.
